MANAGER COMMENTARY

Central Bureau Statistics of Indonesia (BPS) announced September's deflation at -0.05% mom (vs consensus 0.11%, inflation 0.39% in Aug 2015) mostly were caused by lower food ingredients and transportation cost. On yearly basis, inflation printed at 6.83% YoY (vs consensus 7%, 7.18% in Aug 2015). Core inflation printed at 5.07% YoY, higher compared to previous month (vs consensus 4.94%, 4.92% in Aug 2015) on the back of exchange rate depreciation. In the Board of Governors' Meeting on Sept 17th, 2015, Bank Indonesia maintained its reference rate at 7.50%, Lending Facility at 8.0%, and also facility rate (FASBI) to 5.50%. Rupiah depreciated against USD by -4.49% to 14,657 at end of September compared to previous month 14,027. Trade balance was surplus +0.43bn USD (non-oil and gas surplus 1.01bn, oil and gas deficit 0.58bn USD) in Aug 2015. Export decreased by -12.28% YoY mostly driven from export in tins, while imports decreased by -17.06% YoY. FX Reserves decreased -3.63bn USD from 105.35bn USD in Aug 2015 to 101.72bn USD in Sept 2015 to stabilize the IDR exchange rate.

The JII (Jakarta Islamic Index) ended lower in September at 556.088, falling -7.05% MoM. Large cap stocks such as ASII, TLKM, KLBF, UNVR, and INTP contributed to the MoM decline, all of which fell by -11.81%, -7.84%, -17.91%, -4.34%, and -16.18% MoM respectively. Emerging market remained under pressure as global and regional factors brought down investors' confidence in the domestic economy. Foreign outflows was US\$498.4mn and the IDR declined to 17-year low at IDR 14.7k/USD, falling -17% YTD. External factors continue to play a role in influencing Indonesia's monetary initiatives where the central bank has to navigate through inflation and IDR movements. On domestic front however, there were signs of economy stabilization in August where household consumption has shown signs of improvement. Motorcycle sales managed to grow +2% YoY. Investment is also expected to increase as more toll roads and power plants began construction. Furthermore, higher cement sales, imports of capital goods and stronger credit growth are all indicative of increasing investment activity. In addition, the government released several economic policies and initiatives aimed to aid investments and purchasing power. The economy is expected to accelerate in 3Q and 4Q/2015. Sector wise, the Miscellaneous Industry Sector was the worst performing sector this month, falling by -8.06% MoM. ASII (Astra International) and MASA (Multistrada) were the laggards; falling by -11.81% and -5.76% MoM respectively. This was followed by the Infrastructure Sector that posted -6.89% MoM losses, driven by TAXI (Express Transindo) and EXCL (XL Axiata) which fell -59.73% and -12.83% MoM respectively. On the other side, Mining Sector was the best performing sector this month, gained by +1.74% MoM. INCO (Vale Indonesia) and TINS (PT Timah) were the movers, appreciated +41.42% and +5.79% MoM respectively.

We remain selective on companies that offer resiliency in earnings on a backdrop of softer economic activity.
