Foreign investors net flows was at US\$18.54mn for the month where the bulk of the inflows happened during the last 2 weeks of the month, more than offsetting the first two weeks of the month which saw US\$146.5mn foreign net outflows. The outflows were driven by the worry that government will impose some sort of price fixing in a free market environment towards certain industries when the Indonesian government instructed to lower cement selling prices for its state owned cement company in which is operating in an oligopolistic market. Post this action, the government communicated to various media sources that it had no intention to intervene the free market, somewhat bringing positive sentiment back towards the market.
