In the Board of Governors' Meeting on Feb 18th, 2016, Bank Indonesia cut its reference rate by 25bps to 7%, Lending Facility to 7.5% as well as facility rate (FASBI) to 5%. Trade balance was surplus +0.05bn USD (non-oil and gas surplus +0.16bn, oil and gas deficit -0.11bn USD) in Jan 2016. Export decreased by -20.72% YoY mostly driven from export in natural oil, while imports decreased by -17.15% YoY. FX Reserves increased +2.41bn USD from 102.13bn USD in Jan 2016 to 104.54bn USD in Feb 2016 on the back of offshore inflow to the bond market.

The JCI (Jakarta Index) closed higher in February, gaining +3.38% MoM to close at 4,770.96 for the month. Movers were UNVR, HMSP, ASII, GGRM, and MNCN which rose +21.32%, +6.23%, +5.43%, +9.17%, and +56.30% MoM respectively. Foreign investment appetite into Indonesian Market rebounded in February, which was driven by better than expected Indonesia's 4Q15 GDP growth of 5.04% YoY. Better government infra spending absorption became the key driver of economic growth and is expected to continue until 1H16. Lower BI rate of 25bps and potential fuel and electricity price cuts in March/April 2016 will give positive impact on people's purchasing power as well as better utilization rates within the manufacturing industry. Risk remains on whether the current government can introduce business friendly policy introduction and implementation. Sector wise, the Consumer Sector was the best performing sector this month, gaining by +9.76% MoM. UNVR (Unilever) and INDF (Indofood) were the movers; appreciating by +21.32% and +13.71% MoM respectively.
