MANAGER COMMENTARY

Central Bureau Statistics of Indonesia (BPS) announced May's inflation at 0.24% mom (vs consensus 0.2%, deflation 0.45% in Apr 2016) mostly were caused by higher food ingredients, process food and beverages prices. On yearly basis, inflation printed at 3.33% YoY (vs consensus 3.30%, 3.60% in Apr 2016). Core inflation printed at 3.41% YoY, unchanged from previous month (vs 3.41% in Apr 2016). In the Board of Governors' Meeting on May 19th, 2016, Bank Indonesia maintained its reference rate at 6.75%, Lending Facility at 7.25% as well as facility rate (FASBI) at 4.75%. LPS (Deposit Insurance Corporation for banks) announced to cut the insurance rate from 7.25% to 7.00% for period of 15 May 2016 to 14 September 2016. Rupiah depreciated against USD by -3.11% to 13,615 at end of May compared to previous month 13,204. Trade balance was surplus +0.67bn USD (non-oil and gas surplus +1.14bn USD, oil and gas deficit -0.47bn USD) in Apr 2016. Export decreased by -12.65% YoY mostly driven from export in jewelry, while imports decreased by -14.62% YoY. FX Reserves decreased 4.11bn USD from 107.71bn USD in April 2016 to 103.6 USD in May 2016 due to seasonally higher FX demand for payment needs, external govt debt payments and efforts to stabilize rupiah in line with fundamentals.

The JCI (Jakarta Index) closed lower in May, losing -0.86% MoM to close at 4,796.87 for the month. Laggards were HMSP, BMRI, INTP, SMGR, and ASII which fell -4.88%, -6.48%, -15.59%, -9.09%, and -1.86% MoM respectively. Meanwhile the movers were TLKM, ICBP, UNVR, BBNI, and TBIG which gained +4.70%, +6.06%, +1.23%, +4.69%, and +12.24% MoM respectively. Negative sentiment still lingered as weak macro economy numbers still looms. Foreign investors booked net outflow post weaker than anticipated 1Q16 GDP announcement of 4.92% YoY, which was below market expectation of 5.04%. Loan growth, serving as a main indicator on business activities, only reached 7.7% YoY in Apr-16. The lowest growth in the past 5 years. Tax revenue was discouraging as well, contracting by -10.6% YoY, worse than the same period last year of 0% YoY. Lower tax revenue caused the government cut their expenditure budget by IDR 50.2tn, mitigating wider budget deficit risks. Consequently, investors in general sold off. On a more positive note, government noted investors' concerns on slower growth risks in 2nd quarter whereby BI reacted by stating that they will start to issue monetary easing regulation through LTV relaxation and allowed pre-construction loan for 2nd and 3rd home buyers. Lower tax rate on personal income should also improve purchasing power on grass root level. Lastly, the success of tax amnesty program will be the key market catalyst as it would boost local business confidence and increase tax compliance over the longer term. Sector wise, the Basic Industry Sector was the worst performing sector this month, falling by -7.29% MoM. INTP (Indocement) and SMGR (Semen Gresik) were the laggards; falling by -15.59% and -9.09% MoM respectively. This was followed by the Agriculture Sector that posted -4.64% MoM losses, driven by BWPT (BW Plantation) and AALI (Astra Agro Lestari) which fell -16.20% and -12.11% MoM respectively. On the other side, Infrastructure Sector was the best performing sector this month, gaining by +2.58% MoM. INDY (Indika Energy) and GIAA (Garuda Indonesia) were the movers, rising +26.56% and +12.42% MoM respectively.
