Manager Commentary

Central Bureau Statistics of Indonesia (BPS) announced Apr 2018 inflation at +0.10% mom (vs consensus inflation +0.18%, +0.20% in Mar 2018). On yearly basis, inflation was +3.41% yoy (vs consensus inflation +3.50%, +3.40% in Mar 2018). Core inflation was printed at +2.69% yoy (vs consensus inflation +2.77%, +2.67% in Mar 2018). Inflation mostly caused by higher processed food, housing, clothing and healthcare. In the Board of Governors' Meeting on 20 April 2018, Bank Indonesia maintained the BI 7-day Reverse Repo Rate at 4.25%, while maintaining the Deposit Facility (DF) and Lending Facility (LF) rates at 3.50% and 5.00% respectively. Rupiah depreciated by +0.98% to 13,892 /USD at end of Apr 2018 from 13,756/USD in previous month. Indonesia's trade balance in March 2018 records surplus of USD 1.09bn vs consensus -USD89mn. Non-oil and gas trade balance surplus in Mar 2018 is recorded USD 2.02bn, higher than the previous month which was deficit amounting to USD 3.96bn. Meanwhile, oil and gas trade balance deficit to USD 0.92bn in Mar 2018. Indonesia's GDP grew 5.06% yoy in the three months to the end of March, according to Indonesia Bureau of Statistic, lower than forecast of 5.18%, and also against 5.19% at the previous quarter. In qoq terms, Indonesia's GDP fell -0.42% than forecast of -0.3%, but higher than previous quarter of -1.70%. The slower growth was caused by weak of household consumption. Indonesia's foreign reserve assets stood at USD 124.9 billion as of end-Apr 2018, lower than the end of Mar 2018 level at USD 126.00 billion. The decline in the reserve assets in Apr 2018 was mainly due to the use of foreign exchange to repay government external debt and stabilize rupiah amidst increasing global financial market uncertainty.

The JCI ended the month lower at 5,994.6 (-3.14% MoM). Market laggards were HMSP, BBRI, BBKA, BMRI, and UNVR as they fell -11.06%, -10.56%, -5.15%, -7.17% and -6.41% MoM respectively. Indo Equity market fell in 2 consecutive months on the back of higher US yield which rose close to 3% coupled by softer 1Q18 earnings. Most of the investors were still cautious about Indonesia's macro condition especially on purchasing power which has not recovered as market expected. On the other hand, high oil prices environment and rising US Fed rates contribute an additional pressure to the IDR currency as well. All in all, despite JCI has dropped by -7% YTD and back to below 5 years mean valuation, we don't see any near term positive catalysts for the market. We remain cautious on prolonged risk off sentiment which could further pressure the IDR as an outflow from capital market continues. Sector wise, the Finance Sector was the worst performing sector during the week, declining 6% MoM. Ticker wise, HDFA (Radana Bhaskara Finance) and BBKP (Bank Bukopin Tbk) were the laggards, depreciating 33.21% and 26.21% MoM respectively. This was followed by the Agriculture Sector which dropped 5.47% MoM. Ticker wise, SMAR (Sinar Mas Agro Resources & Technology) and DSFI (Dharma Samudera Fishing Industries) posted 20.09% and 14.96% MoM losses respectively. On the other hand, the best sector during the week was the Basic Industry Sector, which recorded a gain of 5.21% MoM. Ticker wise, TKIM (Pabrik Kertas Tjiwi Kimia) and JPRS (Jaya Pari Steel) were the movers which rose 49.28% and 26.09% MoM respectively.
