However in yearly basis, it was higher compared to previous month at 8.79% yoy (vs consensus 8.95%, 8.61% in July) which was driven by staple food price due to the Eid Mubarak holiday, and educational cost caused by start of new school term. Core inflation rose 4.48% yoy (vs consensus 4.43%, 4.44% in July). In the Board of Governors' Meeting on Aug 29th, 2013, Bank Indonesia increased its reference rate by 50 bps to 7.00%, Lending Facility by 25 bps to 7% and the deposit facility rate (FASBI) by 50bps to 5.25%. There are 4 packages: 1. to address current account deficit, 2. to maintaining economic growth, 3. to maintain consumer's purchasing power and lower inflation 4. to speed up investment. Bank Indonesia also announced some action plan: 1. Extend the allowed maturity of forex term deposits from max 30 days to maximum of 1 year, 2. Allow exporters to purchase foreign currency onshore in the amounts that they have previously converted into IDR, 3. Allow banks to "pass on" derivative positions held with third parties to BI, 4. Fund from the sale of assets by non-residents may now be kept in Indonesia and these deposits will be exempted from bank's foreign liability limit, 5. BI to issued deposit certificate of Bank Indonesia (SDBI).

IDR govt bond yields closed higher all across the curve in August on the back of few factors: 1. Concerns over Fed tapering QE, 2. Lower Indonesia's foreign reserves, 3. Higher Indonesia's inflation level due to Eid Mubarak price hike and educational cost on school new term, 4. Lower Indonesia's 2nd Qtr 2013 GDP, and 5. Wider Indonesia's trade balance and current account deficit. No significant movement in the market post stimulus packages from government of Indonesia and Bank Indonesia.
